**SECTION (1):  
GENERAL DESCRIPTION AND BACKGROUND**

**(A) Request for Proposal:** This document constitutes an RFP from qualified organizations to conduct the TR201611, St. Louis In-laid Pavement Marker Survey study for the MHTC and Missouri Department of Transportation (MoDOT).

**(B) Background:**

The Missouri Department of Transportation is always looking for new technologies and processes to improve the safety for the traveling public. One item that has been tried in the St. Louis District is the placement of an in-laid pavement marker. Some states still use snowplowable pavement markers where a slot is cut in the pavement and a cast iron pavement marker is placed in that slot. The design and casting of the snowplowable marker is placed such that it is slightly above the pavement surface and the snowplow blade is able to glide over the marker. However, this type of installation is still vulnerable to snowplows hitting and damaging or removing the marker. As a result, MoDOT wanted to look into the placement of a marker that would be slightly below the surface of the roadway, thus virtually eliminating the damage from snowplows.

MoDOT investigated the potential use of a smaller and non-metal pavement marker that is placed below the pavement surface. However, there was still the need to “shed” water from on top of and around the pavement marker. The inlaid pavement marker consists of a retro-reflective pavement marker installed below the pavement surface. In addition to cutting a location for the marker, a slot shall be grooved in to the pavement both before and after the marker to allow for visibility of the marker and drainage. The marker shall be attached to the bottom of the pavement groove with adhesive. Final product shall have two markers in place at each location. This is for redundancy in case one of the markers is damaged and becomes not reflective. Also, due to the size of the markers, it will provide increased retroreflectivity.

In the job special provision for the projects to place the in-laid pavement markers, the marker shall have completed testing through [National Transportation Product Evaluation Program](#) (NTPEP). A written request for qualification shall be sent by the manufacturer to Construction and Materials with the following information:

- (a) Brand name of the product.
- (b) A copy of the actual test results from NTPEP.
- (c) Certification that the material meets this specification and is intended for use as described.
- (d) Specific installation instructions.

MoDOT has developed this Request for proposal to conduct a survey to evaluate the perception of stakeholders regarding the marker’s performance from a user’s perspective. MoDOT is asking the successful proposal team to conduct a survey to gauge the effectiveness of the markers. This is not an engineering study.

The following are a few images of the in-laid pavement markers:

(C) **Fiscal Year:** MoDOT’s fiscal year runs from July 1-June 30.

(D) **Contract Period:** The contract period will run through October 30, 2016.

(E) **RFP Schedule:** The following RFP Schedule of Events represents MoDOT’s best estimate of the schedule that shall be followed. MoDOT reserves the right at its sole discretion to expand this schedule, as it deems necessary, without any notification except for the deadline date for submitting a proposal.

<b>Date:</b>	<b>Action:</b>
February 29, 2016	MoDOT posts RFP to the website: <a href="http://www.modot.mo.gov/services/OR/orRFP.htm">www.modot.mo.gov/services/OR/orRFP.htm</a>
March 9, 2016	Written comments or questions must be submitted to Contract Administrator.

March 16, 2016	MoDOT will post written responses publicly on the website: <a href="http://www.modot.mo.gov/services/OR/orRFP.htm">www.modot.mo.gov/services/OR/orRFP.htm</a>
March 31, 2016	Written proposals must be submitted to the Contract Administrator.
April 12, 2016	MoDOT will notify submitters about project selection, or if needed about interviews to finalize selection.

**(F) Project Schedule:** The following is an estimate of the project timeline or information on key dates within the project, presuming the project starts May 1, 2016. Proposals need to include a work plan with a proposed timeline. While alternative timelines will be considered, an extension is unlikely. The project timeline will be finalized during the contracting phase.

**Last working day of each quarter:** Quarterly updates on work accomplished during the quarter are due on or before the last working day of March, June, September, and December during the course of the project. These quarterly updates shall be submitted electronically to the MoDOT project manager. These updates are the basis for information in the Statewide Planning and Research (SPR) Quarterly Report that the Construction and Materials Division submits to FHWA at the end of each quarter of the fiscal year.

May 15, 2016: A kick off meeting with MoDOT will be scheduled to discuss project requirements and deliverables. The dates of key milestones and deliverables will be determined from this meeting.

June 20, 2016: Successful proposal team will begin regional surveys.

August 1, 2016: Successful proposal team will provide top line results to MoDOT.

September 30, 2016: Successful proposal team will analyze data and provide a draft report of results of the survey to MoDOT. On this date the successful proposal team will also provide a draft technical summary for MoDOT review.

October 15, 2016: MoDOT to provide feedback on the draft report and technical summary.

October 30, 2016: Final report is completed.

The Final Report and Technical Summary are two separate deliverables. The technical summary shall include a simple listing of results from the research, and summary of the project history. This document is intended to be a short summary of the project and its findings. This should be a 1-2 page summary.

**Interim presentation:** An interim presentation shall be scheduled near the mid-point of the project to update MoDOT on the progress and the direction of the project. This is in addition to

the necessary communication between the Principal Investigator(s) and MoDOT contacts throughout the project. The purpose of the interim presentation is to evaluate the progress and determine if any mid-project corrections are necessary.

[www.modot.org/services/OR/orTemplates.htm](http://www.modot.org/services/OR/orTemplates.htm).)

## **SECTION (2): SCOPE OF WORK**

**(A) Services:** The Offeror shall provide

The Offeror shall provide a regional, stratified random sample survey of Missouri adults relying on a margin of error of +/- 5 percent, using one, or a combination of the following methods: persons at Department of Revenue license offices, telephone survey, web surveys, mail surveys, in-person interviews, intercept surveys, and/or panel surveys. MoDOT is also requesting that the survey effort include county officials and law enforcement personnel.

The survey questions are to assess drivers' attitudes and awareness of the in-laid pavement markers. The survey also should include basic demographic information for the respondents, including the following: age (in categories), sex, ethnicity, household income, and type of vehicle driven most frequently (car, minivan/van, sport utility vehicle/crossover, pickup truck, other truck, or motorcycle).

Reporting of the survey results should be summarized into a report and compiled by county for the different respondents. Overall data must be weighted proportionally to match the true distribution of the regional population geographic, gender and age distributions.

A technical team is in place for the project. This team includes staff from the St. Louis District and Research staff in Jefferson City. The successful survey team is asked to work with MoDOT to identify the appropriate target audience for the survey and also to develop the survey questions. It is also asked that upon selection a set of stakeholders be developed to target for the survey. At a minimum, MoDOT is looking for a survey to the general public, law enforcement and county officials to target their input on the effectiveness these markers have for the enhancement of safety along the corridors where the in-laid pavement markers are placed.

The MoDOT team has identified a few questions to be answered, however will rely on the experience of the successful survey team to appropriately frame the questions and determine other questions for the final survey. The MoDOT team developing this RFP is looking for answers to the following questions in the survey (at a minimum):

- How far or how many reflectors down the road can you see while it is raining during various rain intensities?
- Do the reflectors perform better than other markings in your opinion?

- How safe do you feel while driving a route with these reflectors compared to a similar route without these reflectors?

**Location of the In-laid pavement markers:**

**I-70:** from I-170 or mile marker 239.0 to Branch Street @ mile marker 248.7 both directions.

**Communities that these reflectors run through are:** St. Louis County, Bel-Ridge, City of St. Louis, Bel-Nor, Greendale, Normandy, Norwood Court, Jennings and Pine Lawn.

**I-44:** from the East end of the Meramec River Bridge or mile marker 276.4 to the bridge over I-55 ramp or mile marker 290.1 both directions.

**Communities that these reflectors run through are:** Sunset Hills, Kirkwood, Crestwood, Oakland, Webster Groves, Shrewsbury and the City of St. Louis.

**I-270:** from just North of I-44 @ mile marker 6.3 to South of Manchester Road / Route 100 @ mile marker 9.7 both directions.

**Communities that these reflectors run through are:** St. Louis County, Kirkwood and Des Peres.

**(B) Specific Requirements:** The Offeror will provide to Construction and Materials five (5) paper copies – or an electronic copy – of a program proposal which will help bring the project to its successful completion.
