15 YEAR (1992-2007) ROAD AND BRIDGE PROGRAM

January 3, 1992

COSTS ARE IN MILLIONS OF 1992 DOLLARS

A QUALITY HIGHWAY SYSTEM FOR MISSOURI

The people of Missouri said "Yes" to Proposition A in 1987. Approved increases in road user fees permitted Missouri road building programs to move forward. This work is now in progress and ahead of schedule.

The Missouri Transportation and Development Council asked in 1989 that we reexamine unfunded road and bridge needs for the period 1990-2000. Needs beyond Proposition A totaling \$5.5 billion were identified. The Highway and Transportation Commission approved this study 11-3-89.

Requests for even more road improvements continue to be received. Private citizens, local governments, metropolitan planning organizations and corridor groups ask that our list of needs be dramatically expanded. An increase in federal funds, a longer time frame, continued good prices, and a reasonable increase in state user fees can accommodate most of their desires.

We propose a 15 year program. The first five to six years will complete Proposition A. Remaining years incorporate the identified needs of 11-3-89, needs requested since, and other work related to a longer time frame (such as adding lanes on I-70 from Kansas City to St. Louis).

In addition to Proposition A funded projects, key elements of this Program are:

- 1,682 Miles of New Dual Highways
- 1,468 Miles of Other Roadway Construction
- Replacing or Rehabilitating 892 Bridges
- Strengthening 494 Bridges to Permit Two-Way Traffic
- 338 Miles of Pavement Replacement
- 1,597 Miles of High Type Resurfacing
- 19,600 Miles of Low Type Resurfacing
- 3,060 Miles of Shoulder Improvement
- 1,500± Safety Projects
- Retrofitting Appropriate Bridges to withstand Earthquake
- Freeway Surveillance and Congestion Management

The program will:

- Place all cities over 5,000 on a four-lane highway
- Provide four-lane service to all major lakes
- Remove all one-way posting on two-way bridges
- Upgrade all big truck route bridges to carry legal load limits
- Make driving twice as safe as today

Positive effects include:

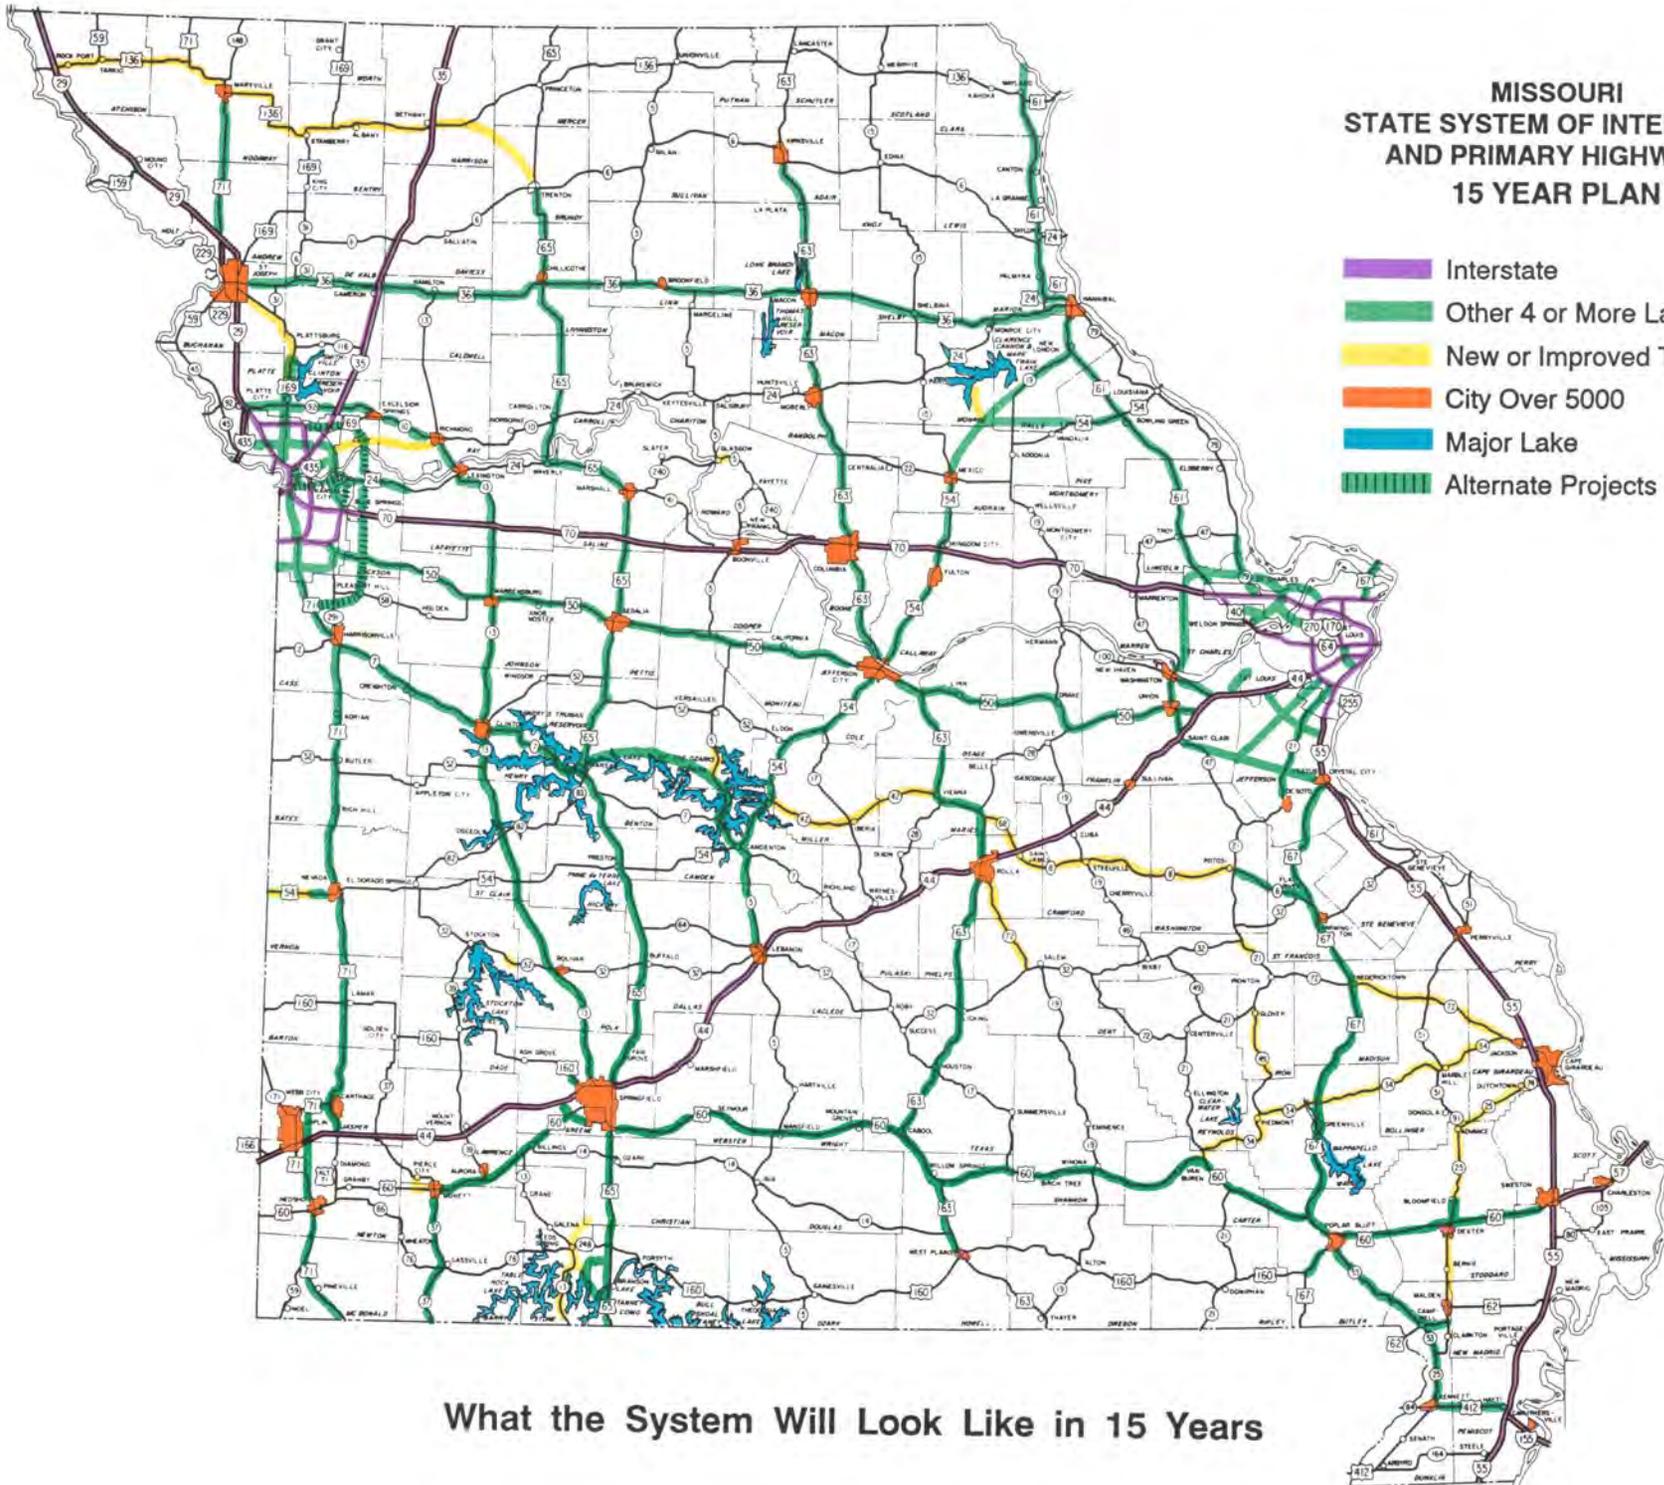

- New jobs
- More tourism
- Reduced travel times
- Lower vehicle operating costs
- Reduced fatalities

The program will pay for itself in lives saved.

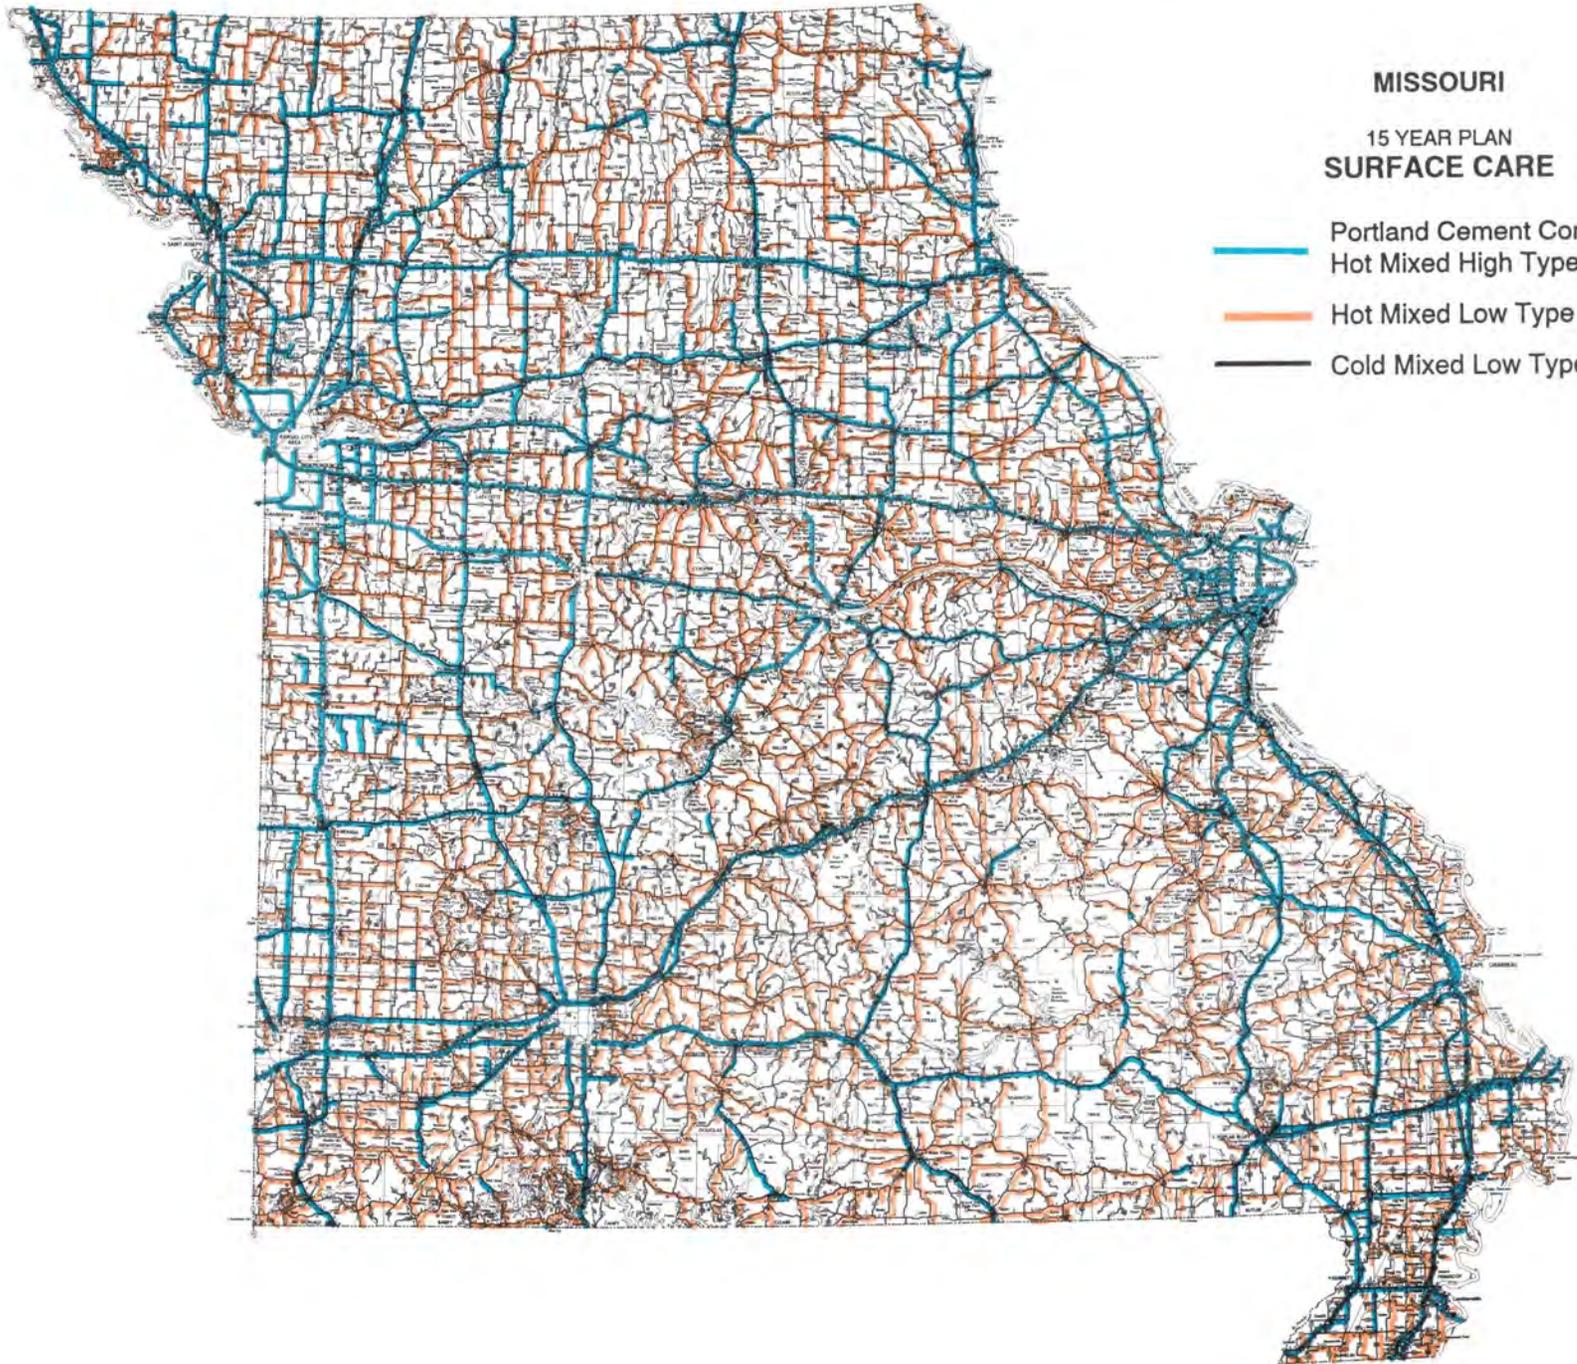

MISSOURI STATE SYSTEM OF INTERSTATE AND PRIMARY HIGHWAYS 15 YEAR PLAN

- Interstate
- Other 4 or More Lanes
- New or Improved Two-Lane
- City Over 5000
- Major Lake
- Alternate Projects

7	Truman Reservoir Companion Structure	A3464
13	Missouri River at Lexington Replace with Four-Lane Bridge on New Location	G 55R
35	Missouri River at Kansas City Eight-Lane Companion Structure	L 734R
47	Missouri River at Washington Replace with Four-Lane Bridge on New Location	K 969
51	Mississippi River at Chester Rehabilitate	-
59	Missouri River at Winthrop Redeck	K 697R
65	Missouri River at Waverly Replace with Four-Lane Bridge on New Location	G 54R

<u>ROUTE</u>	<u>LOCATION AND WORK TYPE</u>	<u>BRIDGE</u>
70	Missouri River at Rocheport Four-Lane Companion Structure	L 962R
435	Missouri River at Kansas City Widen and Rehab or Replace	A 767R

NOTE: A Major Bridge is 1500 feet or greater in length and crosses the Missouri or Mississippi River, or a major lake.

January 3, 1992

**UNFUNDED PORTION OF 15 YEAR PROGRAM
ROAD WORK**

<u>WORK TYPE</u>	<u>MILES</u>	<u>COST</u>
(1) Freeway	540.3	2,451.0
(2) Freeway 2	150.7	262.5
(3) Freeway 3	68.0	6.8
(4) Expressway	1,141.6	2,074.5
Add Lanes	702.0	1,829.6
Two-Lane	498.8	688.8
Other	116.4	394.7
TOTAL	3,217.8	7,707.9

- (1) Like Present Interstate Routes Where Access is Granted at Interchanges Only.
- (2) Upgrade Existing Expressway to Freeway
- (3) Preliminary Design and Right of Way Preservation for Future Freeway
- (4) Four or More Lane Divided Facility where Interchanges are Provided at Key Locations like Route 63 from Columbia to Jefferson City.

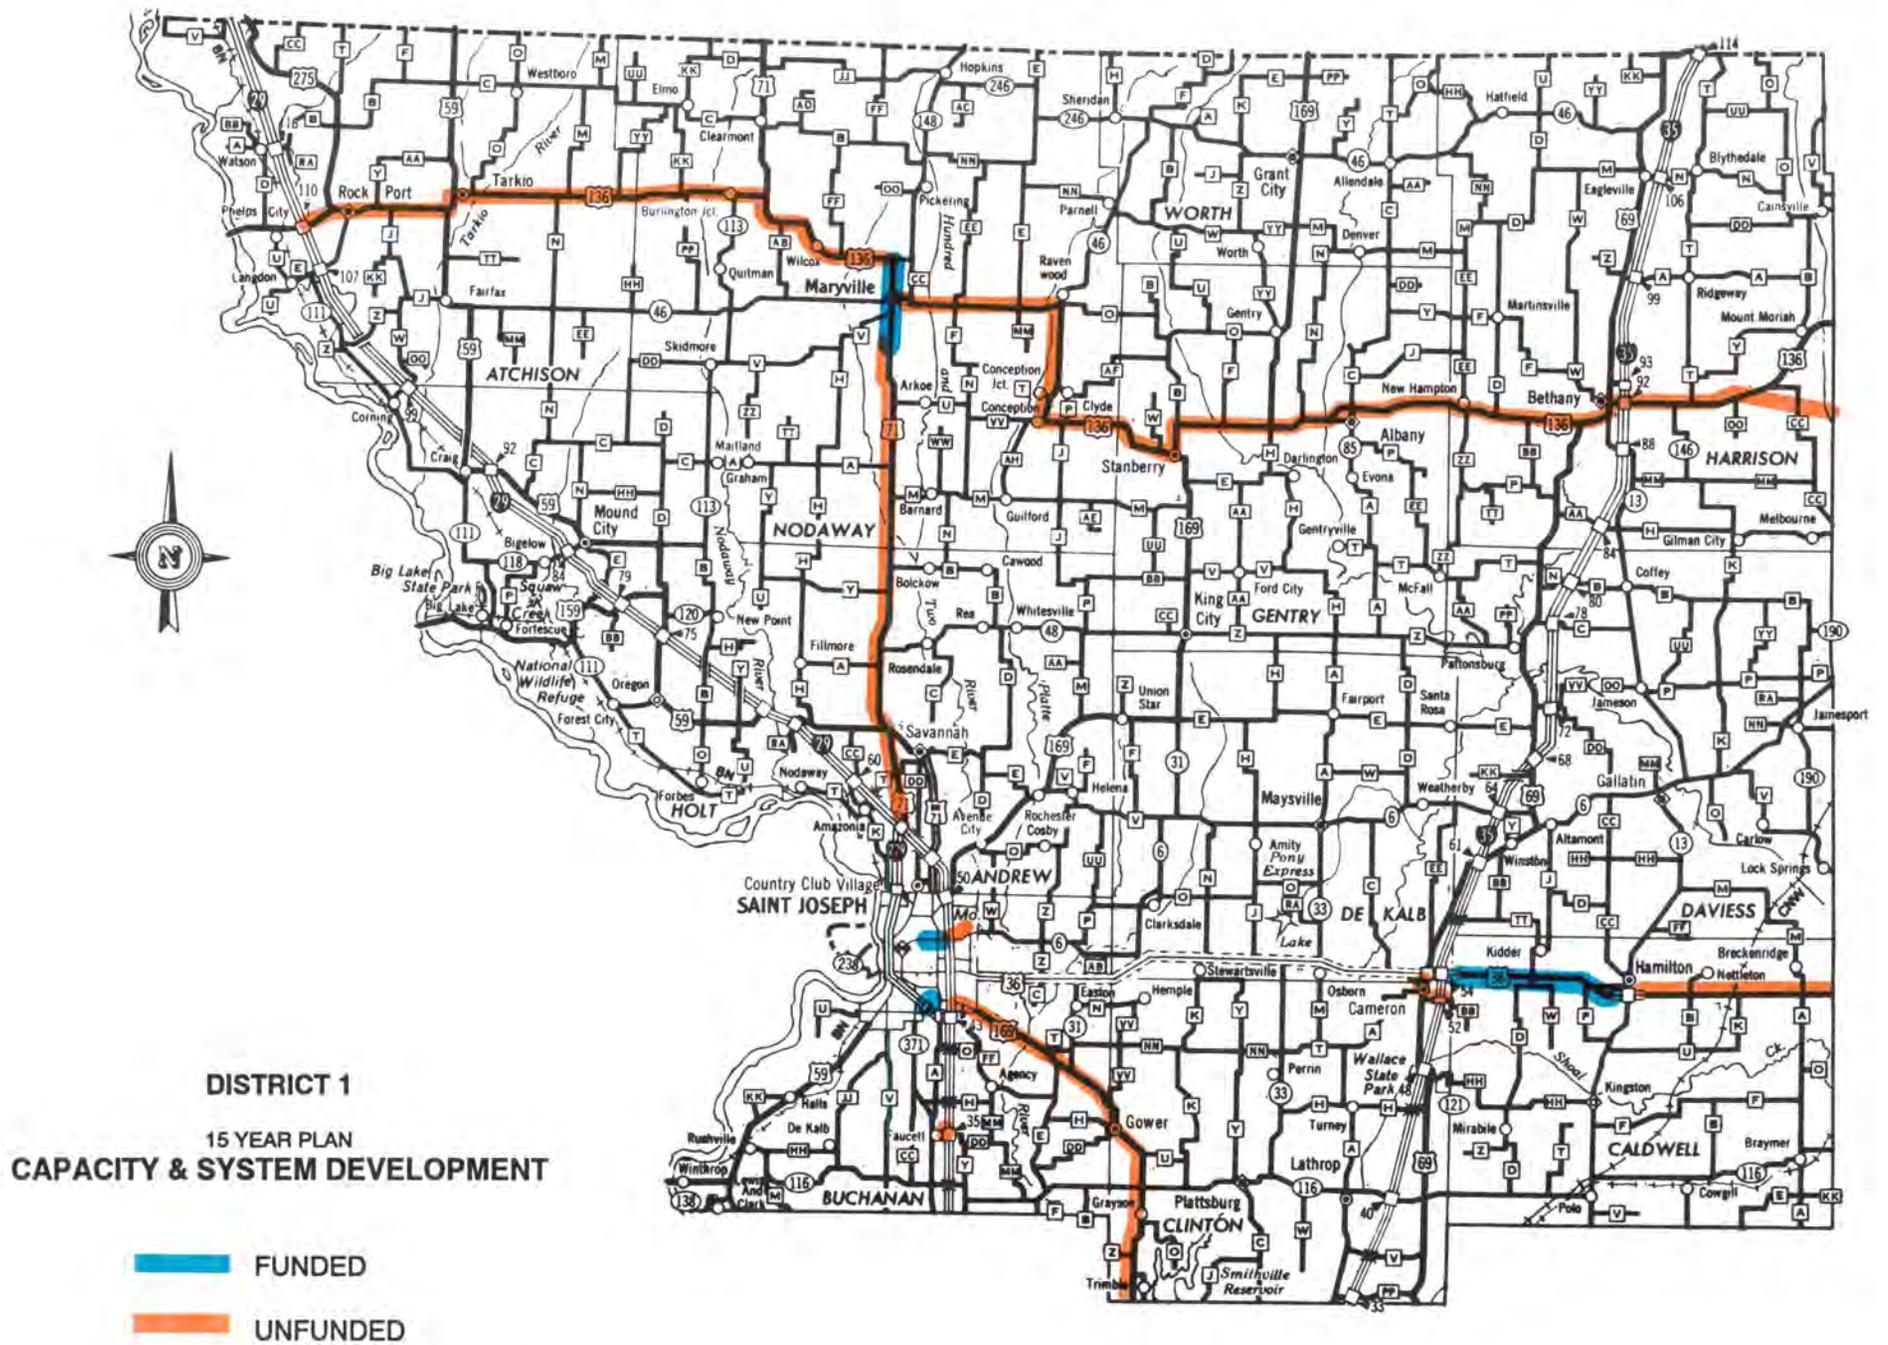

COMPOSITE TABLE OF DUAL DIVIDED ROAD MILEAGE

Existing Mileage	2,245
(1) Remaining Prop A	265
Unfunded	1,682
	<hr/>
Year 2007 Total	4,192

(1) As of October 1, 1991

DEFINITION OF SELECTED TERMS

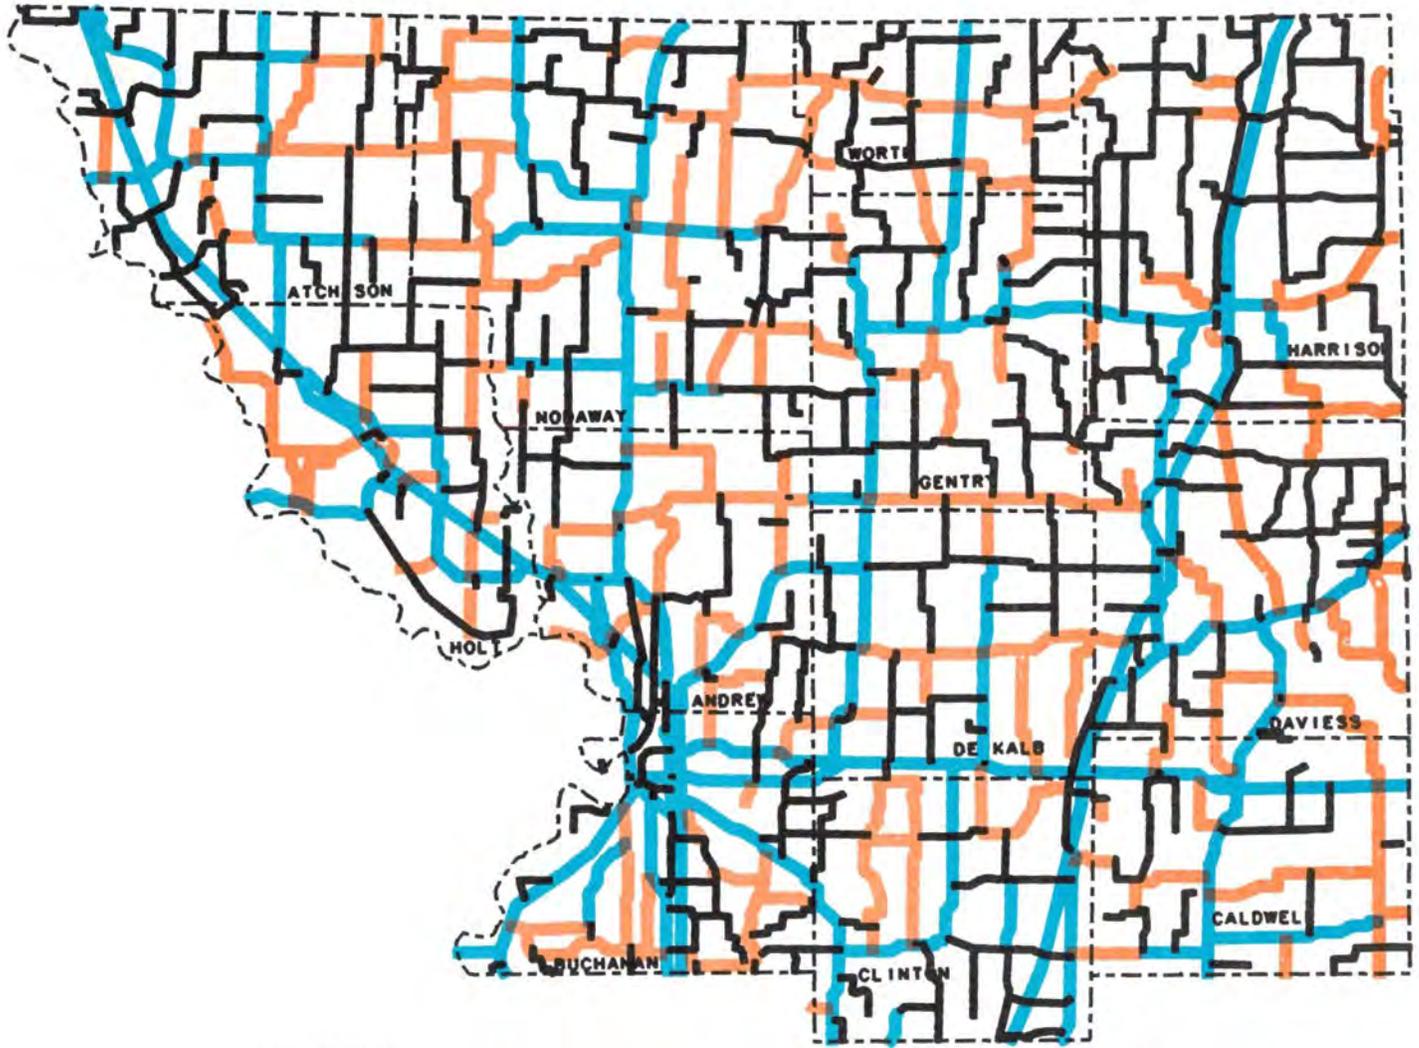

- Expwy = Expressway (See page 6 for further definition)
- Frwy = Freeway (See page 6 for further definition)
- N/O = North of
- NCL = North City Limit
- NUL = North Urban Limit
- R/W = Right of Way
- WT = Work Types Listed Below
- F = New Freeway or Upgrade Two-Lane Facility to Freeway
- F2 = Upgrade Expressway to Freeway
- F3 = Preliminary Design and R/W Acquisition for Future Freeway
- E = Expressway
- P = Parkway
- A = Add Lanes for Capacity
- T = Two-Lane
- O = Other (Such as Construct Interchange)
