Kevin – Yeah, I created the video how to add in a base component projecting to design...

Here is the path to the HTML file: (of course the root is diff. for you)

D:\MoDOT_V8\Gpk_Std\Roadway_Designer\HTMLhelp\Videos\Components\Base\Base.html

I didn't think so but Alexa was thinking it was. What video do we have for the base?...

Dave,

Regarding my email far below Alexa thinks the video file is called Base.html

http://library.modot.mo.gov/CADD/Files_for_Download/Base.Xzip

Is that correct?

Thanks
Kevin

Kevin,

The Subgrade tie-in video on the help tutorials points to http://library.modot.mo.gov/CADD/GeoPak/Gpk_Std/Roadway_Designer/HTMLhelp/Videos/Help/Video/SubgradeTieIn/SubgradeTieIn.html but it's not finding that directory.

I looked in our t drive, and I found it under
T:\Gpk_Std\Roadway_Designer\HTMLhelp\Videos\Components\Base\Base.html

I want to show this video in class, it defines how to do rock fill base to daylight really well.

Thanks

Subject: Missing File

Dave,

Could you check your data for this file:

[/Roadway_Designer/HTMLhelp/Videos/Help/Video/SubgradeTieIn/SubgradeTieIn.html](#)

We don't have this file and thus the link to the video is broke.

Thanks

Kevin
