

Activation Wizard for MicroStation

This documentation will demonstrate the steps to get a license for running MicroStation. You may have to do this if the server that handles the licensing goes down or if you need to reconnect to the license server.

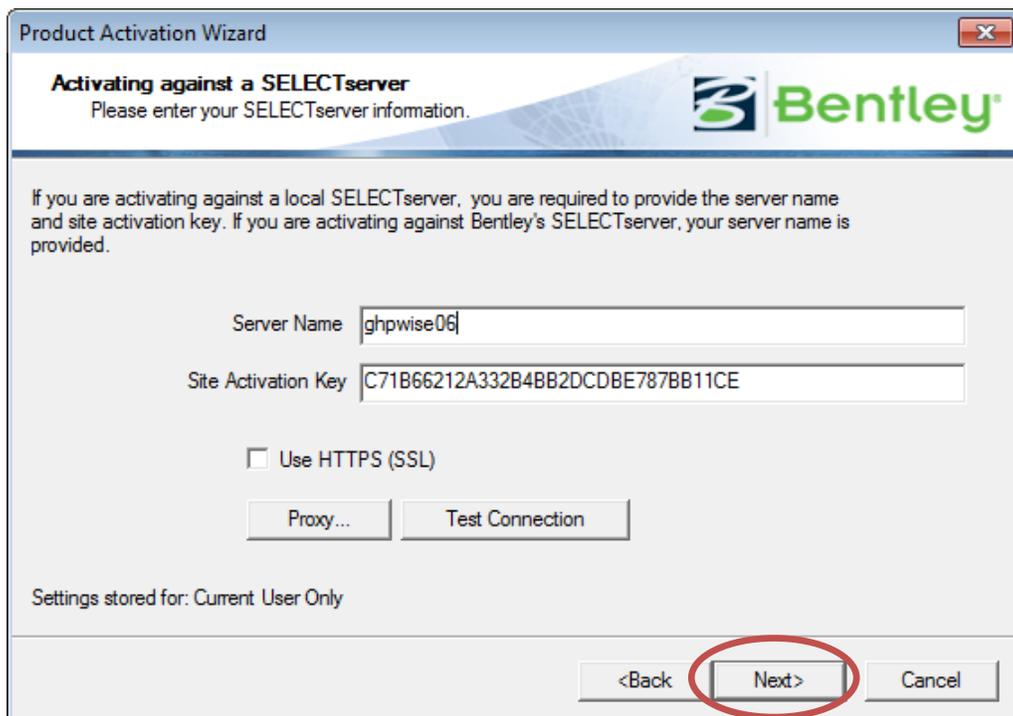

1. Click **Activate** in the dialog box.

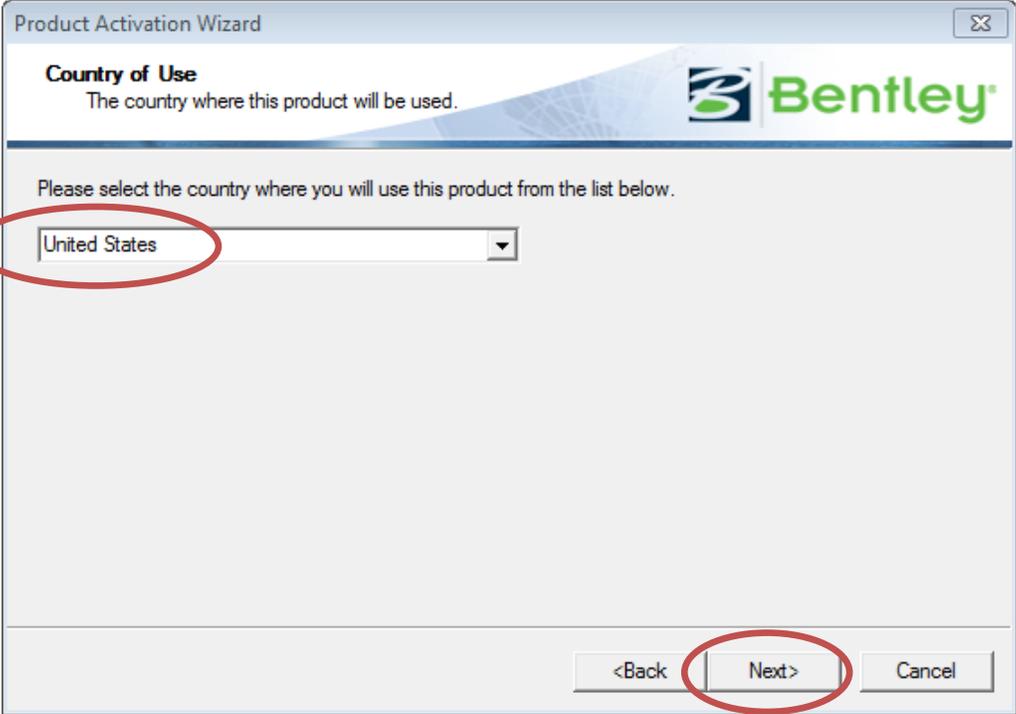

2. Select the option of **“SELECT subscriber with a deployed (local) SELECTserver”** and then click **Next**.

3. The Server Name and Site Activation Key should already be filled out. Now select **Next** to connect to the server and get the license.

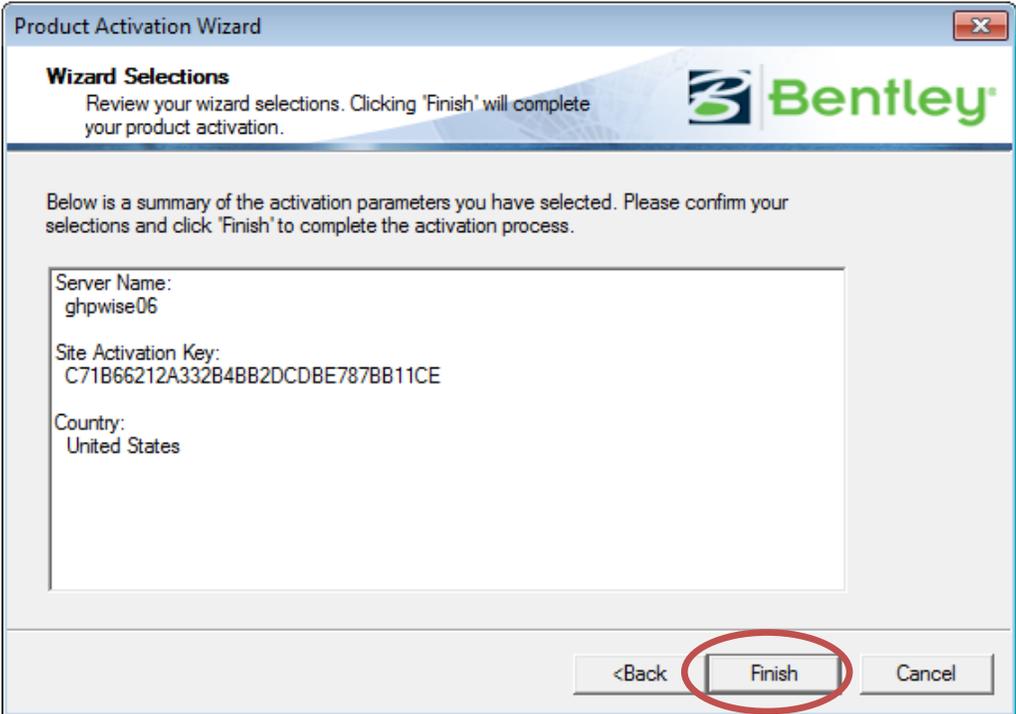

4. Make sure the country is set to **United States** and click **Next**.

The screenshot shows the 'Product Activation Wizard' window. The title bar reads 'Product Activation Wizard'. The main heading is 'Country of Use' with the subtitle 'The country where this product will be used.' The Bentley logo is in the top right. Below the heading, it says 'Please select the country where you will use this product from the list below.' A dropdown menu is open, showing 'United States' selected. At the bottom, there are three buttons: '<Back', 'Next>', and 'Cancel'. The 'Next>' button is circled in red.

5. Now you will see the summary of the activation parameters. Click **Finish** to complete the activation process.

The screenshot shows the 'Product Activation Wizard' window at the 'Wizard Selections' step. The title bar reads 'Product Activation Wizard'. The main heading is 'Wizard Selections' with the subtitle 'Review your wizard selections. Clicking 'Finish' will complete your product activation.' The Bentley logo is in the top right. Below the heading, it says 'Below is a summary of the activation parameters you have selected. Please confirm your selections and click 'Finish' to complete the activation process.' A text box contains the following information: 'Server Name: ghpwise06', 'Site Activation Key: C71B66212A332B4BB2DCDBE787BB11CE', and 'Country: United States'. At the bottom, there are three buttons: '<Back', 'Finish', and 'Cancel'. The 'Finish' button is circled in red.
