

In order to merge sealed and signed .pdf's you must first open Adobe Acrobat Professional 8. This is the only version that is able to do this task.

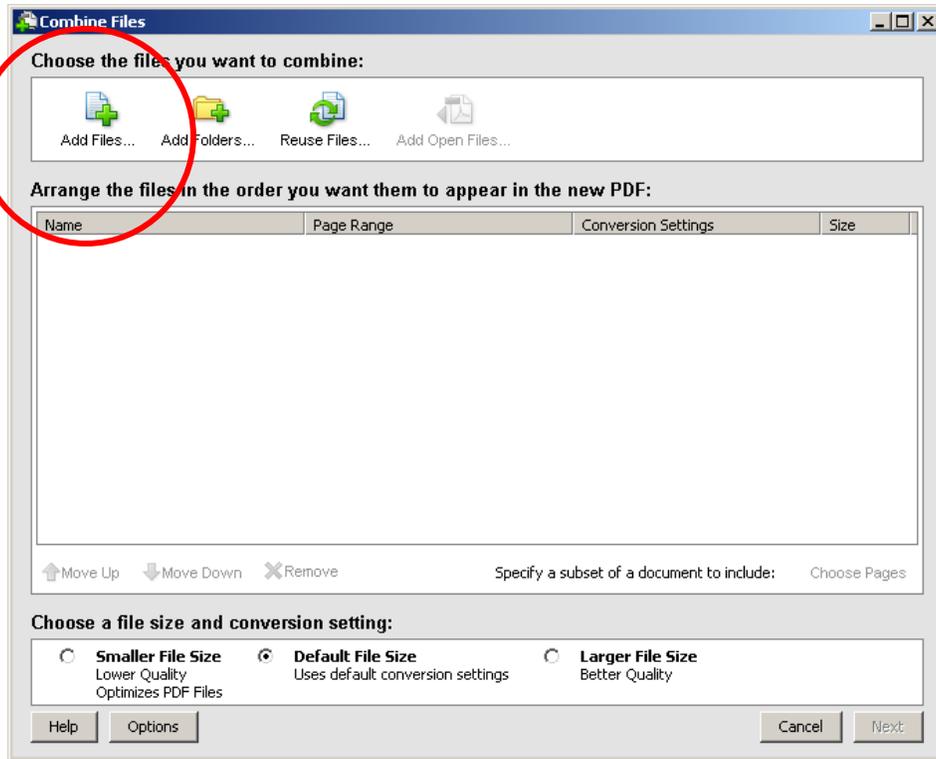

When you open Acrobat Professional 8 the Getting Started With Adobe Acrobat 8 Professional screen should popup.

** if the Getting Started screen doesn't appear when you open Acrobat 8 then go to Help, select it off of the drop down menu.

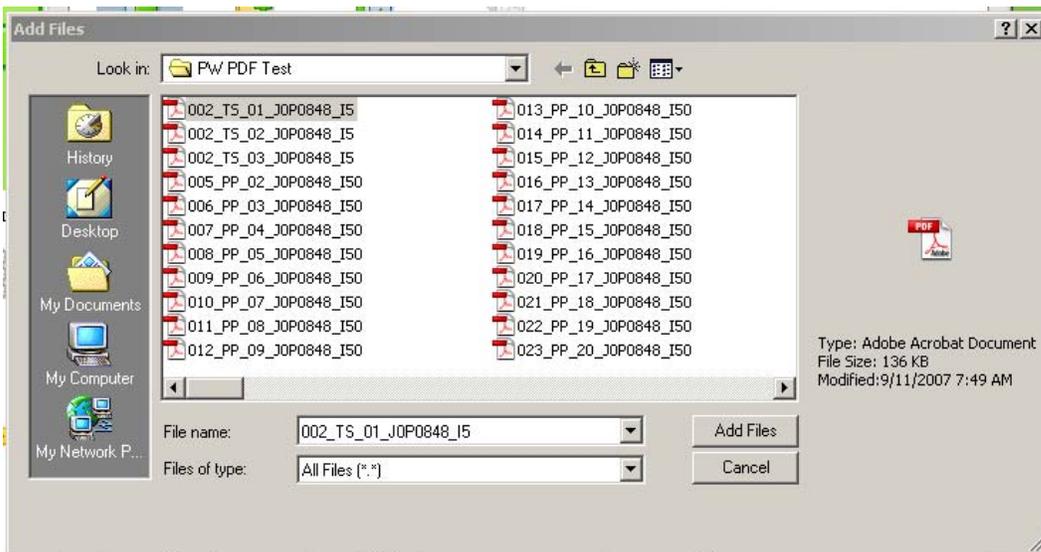

Select Combine Files.

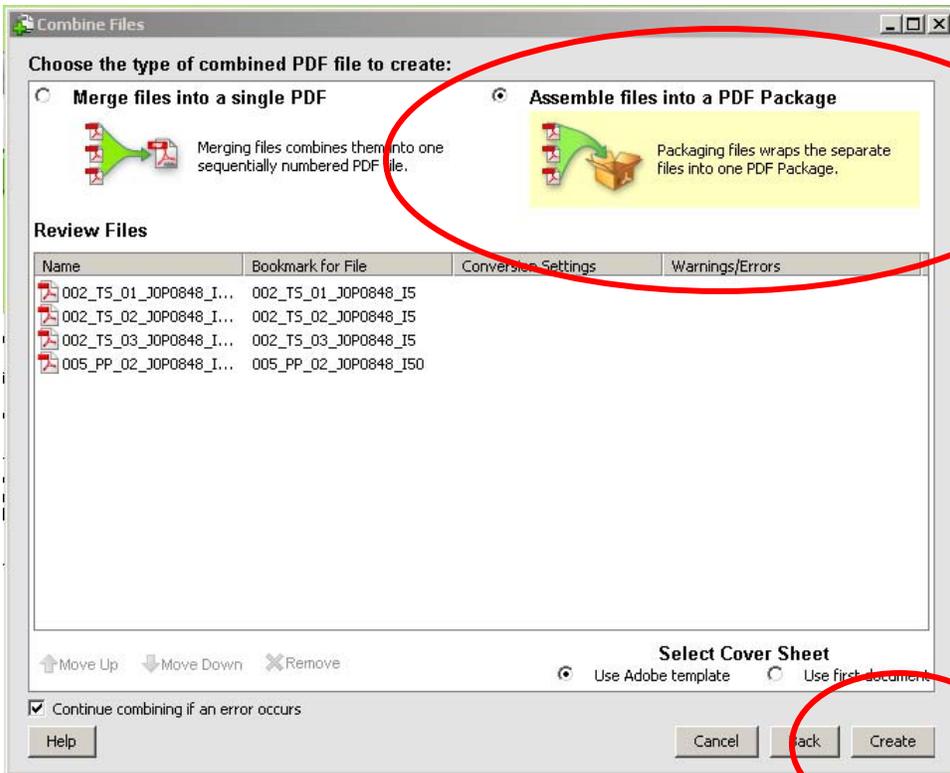

With the Legal Documents highlighted select Combine Files.

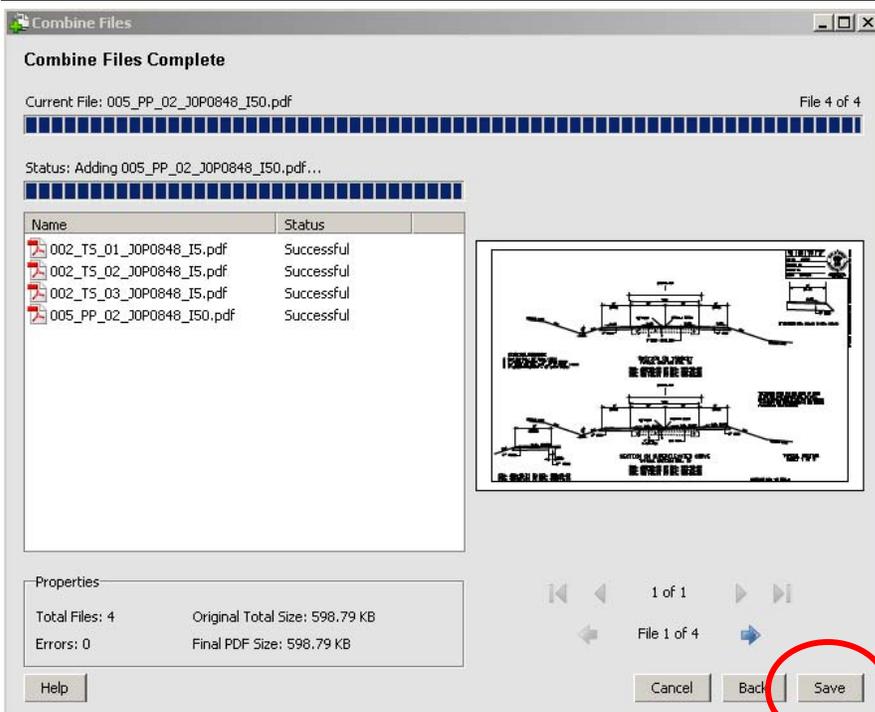

Select Add Files...

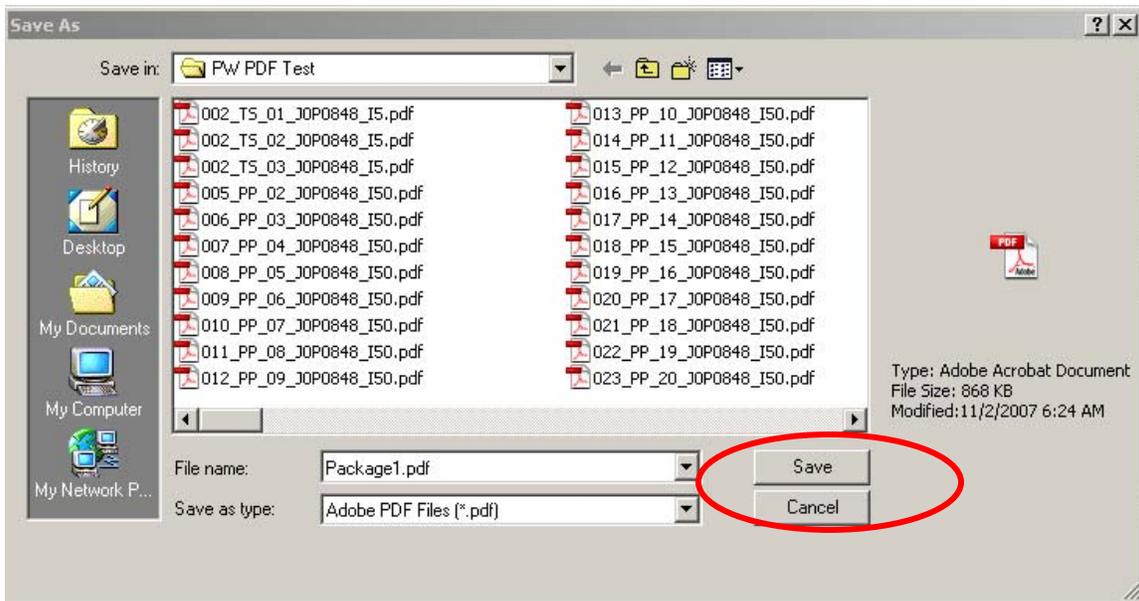

In the Add Files Window you will need to navigate to your files that you would like to combine. You may select and add them one at a time or by holding down the SHIFT key and selecting the first file and then the last file with highlight a group then click Add Files. (if you want to select individual file hold down the CTRL key and select the files that you would like to combine and then click Add Files)

On the combine files window Select Assemble files into a PDF Package then select Create.

Select Save

Navigate to where you would like to save it, give it a name and click Save.
