

# Bid Tabs Pro Plus – Printing & Reports

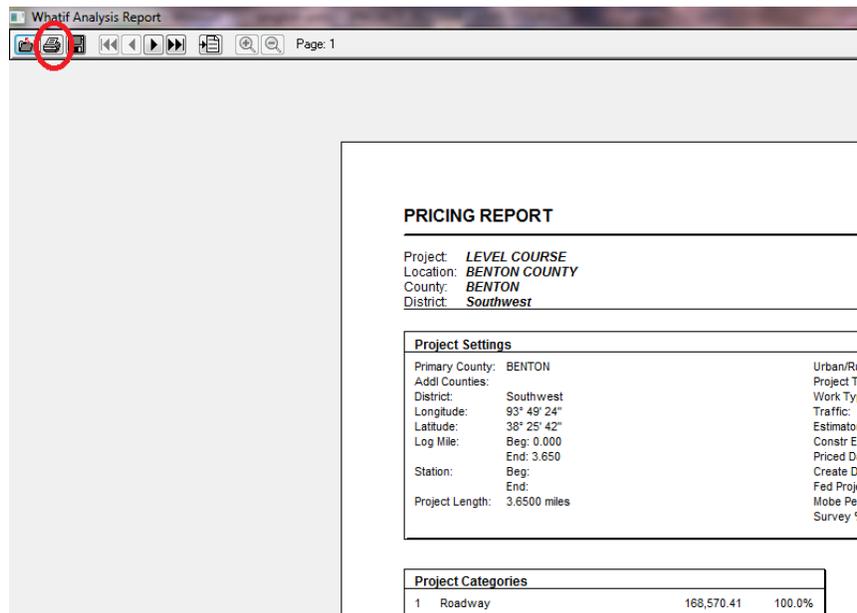

The reports in this section report on the actual Bid Tabs Pro PLUS information, whereas, earlier reports reported on the data contained in various databases in the Bid Tabs Pro system. This information will be strictly on what has been placed in your project. We also look at printing methods.

## Creating the Project Summary and Pricing Report Hard Copy

1. With the estimate open, Select Print button. Then check the boxes as shown. Make sure to check the "Include Summary Sheet" then select "Preview".

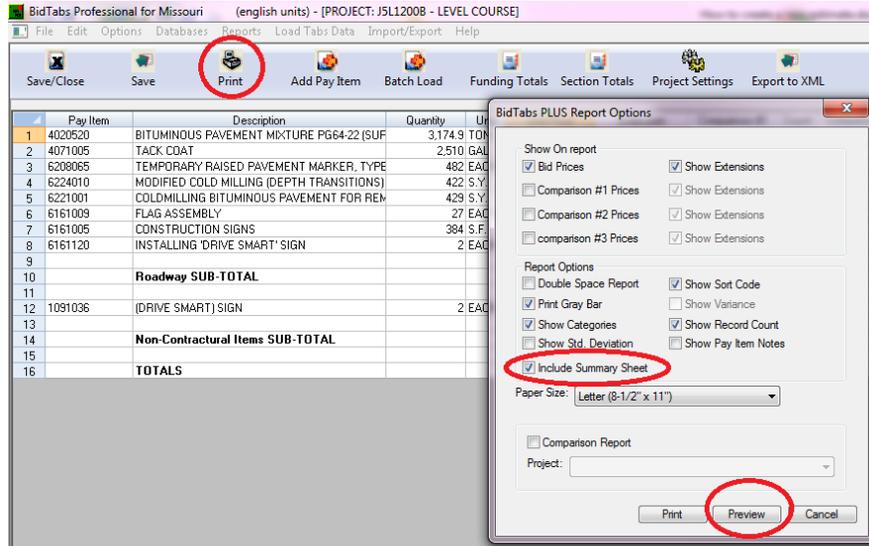

2. Select the printer icon from the top left corner to print a hard copy.

3. Select your printer from the printer options and print.

## Creating the Project Summary and Pricing Report to be exported to ProjectWise using Print method.

1. Open a Bid Tabs Pro PLUS Project
2. Click on the Print Button

3. Click on the diskette in the upper left to Save the Preview as a file.

## D15 Report

The D15 report for lighting and signals is created in two sheets. The first sheet is the letter for the D15 sheet and the second is the actual items list.

1. Click D-15 Report under the Reports pull down inside of an active project in Bid Tabs Pro PLUS.

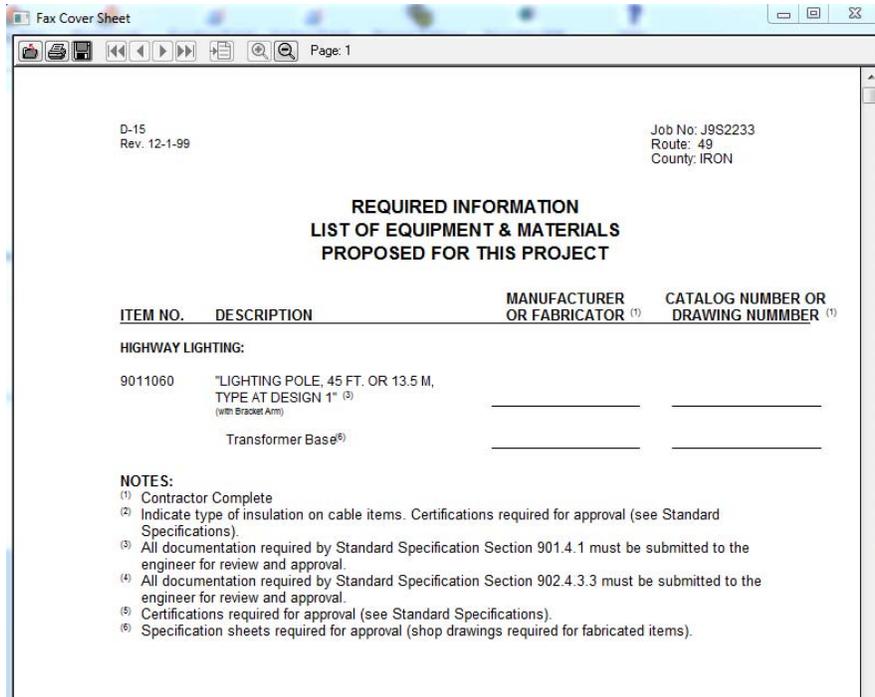

2. After clicking the D-15 Report button, the 2 Screens are available to print or save as a file.

Sheet 1, Fax Cover Sheet, D-15 Letter

3. Print or save this screen.
4. Close the screen to display the second sheet

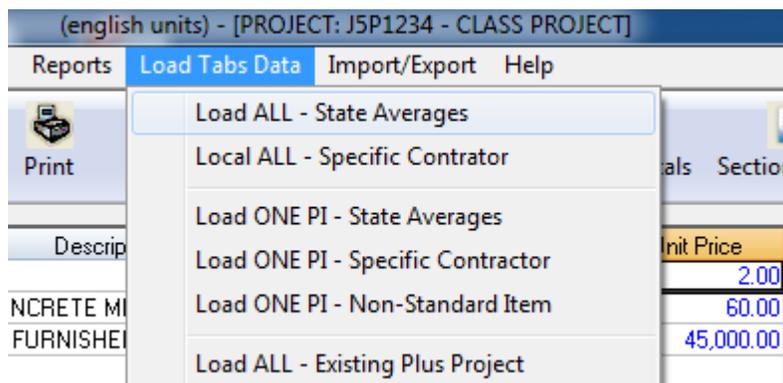

Second screen shows the lighting or signal equipment.

5. Print or Save this screen.

## Loading Tabs Data

There are reports that will do comparisons for what the average price for some of the items is. To do this, you may want to Load Tabs Data for State Averages. Doing this will add a comparison column for State Averages.

1. In an open project in Bid Tabs Pro PLUS click on the Load Tabs Data pull-down menu

2. Click Load ALL – State Averages

3. Choose the settings for what you want data on. IN the above screen shot, you'll notice a county and date range is chosen. If you select All to everything, this could take up to 10 minutes to generate.
4. Click Load

After the data has finished loading, you will see a column with either State Averages or the County name if one was selected.
